Lucas Zoser

FULL STACK DEVELOPER

I've already worked as an intern in the infrastructure area, developing and maintaining Linux servers, automating routines and web development.
For the last 2 months I've been freelancing in FrontEnd. Mainly using **Angular, HTML, CSS, JavaScript and BootStrap.**

EXPERIENCE

Freelancer, Brasília
FrontEnd Developer
July 2023 - Present

Project: **Studex - Pokedex of Curriculums** (**Project Link**)
- The site aims to bring together UniCEUB's technology students and put together a curriculum showing their main programming skills, all in a playful way that refers to the Pokemon cartoon.
- Technologies: Python, Flask, SQLAlchemy, Bootstrap, HTML, CSS, JavaScript, Figma, Apache2, MariaDB. Version control: Git.

Project: **Klas** – A **Course platform** (**Project link**)
- A site that aims to recommend programming content for beginners in the area, based on courses, websites, languages and more.
-**Technologies**: Python, MySQL, Flask, HTML, CSS, Figma, Gunicorn, Apache2 and MariaDB.

CONAB, On-site
Infrastructure Trainee
April 2022 - June 2023

- Development and maintenance of an e-mail server using
Postfix, AWS, MariaDB, Apache, Mautic, PHP.
-Developing process documentation for new trainees, teaching them the main concepts and tools required.
-Development of **ASNAB-DF** website using **Mobirise, HTML, CSS.**
